

Yuri Okeren

East Gwillimbury, ON, Canada

365-737-0015 | yuri.dev44@outlook.com | github.com/yuriongit | linkedin.com/in/yuri-okeren

Software Engineer with 1½ years of experience building full-stack applications, with a focus on backend systems, APIs, and service architecture.

Skills

Languages:	TypeScript, Go, Python, SQL, JavaScript
Frameworks & Runtimes:	Node.js, Bun, Express, Gin, FastAPI, React
Databases:	PostgreSQL, MongoDB, Redis
Infrastructure & Tooling:	Docker, Linux, Git, GitHub Actions

Projects

NBA Fantasy Basketball Platform | *FastAPI, MongoDB, Redis, Cloudinary* *Jun 2026 - Present*

- Built a FastAPI backend to persist and serve NBA stats, reducing rate-limited external calls to the official NBA Stats API
- Automated player and team data updates across asset storage and MongoDB using scheduled workers

Internal Product Management System | *React, TypeScript, Express, Supabase* *Apr 2026*

- Built an internal product management system for an embroidery company, replacing a manual and error-prone Google-Sheets workflow for tracking customer orders
- Integrated login with Supabase Auth for user authentication and authorization, establishing protected access to the application

URL Shortener | *TypeScript, React, Express, MongoDB, Redis* *Jul 2026 - Present*

- Containerized development and deployment with Docker, using GitHub Actions for CI
- Implemented cryptographic alias generation, accompanied by collision-safe retry handling
- Introduced caching for frequently accessed URLs and aliases to minimize database lookups and speed up redirects

Work Experience

Full-Stack Engineer Intern | *Dravit – Remote, ON* *Sep 2025 - Jun 2026*

- Built a Gemini-powered chatbot for client inquiries, automating manual FAQ responses
- Rebuilt a legacy static site in React and TypeScript, creating the codebase and integrating the chatbot API

Freelance Software Development | *Self-Employed – Remote, ON* *Feb 2025 - Present*

- Manage full-stack web application development from initial setup through deployment and maintenance
- Collaborate with clients to translate business needs into project scope, ensuring operational requirements are met

Education

Thompson Rivers University | B.Sc., Computing Science

Starting Fall Semester, 2026

Huron Heights Secondary School | O.S.S.D

Jun, 2026
